

# INTELLIGENT LOCKERS

Product Overview

# LOCKTEC

## YOUR PARTNER FOR SMART LOCKERS

### About us

LockTec is one of the world's leading manufacturers of electronic locker systems.

We have been producing locker solutions for 40 years, for a huge variety of applications.

Today our locker systems are being used in more than 50 countries.

### Quality "Made in Germany"

LockTec is part of a medium-sized, owner-managed group of companies, with over 100 employees, based in Weißenbrunn in Upper Franconia, Germany.

Like its sister company SITEC, LockTec considers the mark of quality "Made in Germany" to be a top priority.

## FULL SERVICE

### PROJECTING

We plan and project your locker system – up to its full integration.

### PRODUCTION

The systems are manufactured using the latest technology according to your specific requirements.

### SOFTWARE

We offer our own software solutions for smooth processes.

### INSTALLATION

We deliver and install the locker systems and train your employees.

### SERVICE

Even after delivery, we are here to help.

# LEFT LUGGAGE LOCKERS

## LOCKSAFE 5.2

### Electronic, keyless left luggage lockers

Locksafe 5.2 is the luggage locker system for public areas. A robust outer housing, double-walled doors and multi-point locks ensure a high level of security against vandalism and theft.

Both individual and entire systems can be networked as a SaaS solution with a management server – even across locations. This means that all systems can be centrally controlled and monitored, regardless of location.

## BENEFITS ...

### ... for the operator

- ✓ The electronic key (QR-code ticket) cannot be copied and if it is lost the lock doesn't have to be replaced.
- ✓ Rental prices can be comfortably modified remotely via the backend.
- ✓ The various types and sizes of lockers are designed to fit different pieces of luggage. Even for bulky golf or ski equipment, Locksafe 5.2 offers the right compartment.
- ✓ Easy administration via the user interface or a management server.

### ... for the user

- ✓ Secure luggage storage provides freedom to go shopping, sightseeing and eating out.
- ✓ Multilingual menus at the payment point guarantee ease of use.
- ✓ Rental fee can be paid with coins, bills or cashless.
- ✓ Lockers equipped with integrated sockets can be used to charge electronic devices.
- ✓ Consistent use across all locations.

### Applications:

- AIRPORTS**
- TRAIN STATIONS**
- SHOPPING CENTERS**
- FERRY TERMINALS**
- AMUSEMENT PARKS**
- MUSEUMS**

# CLICK & COLLECT SERVICEBOX

## Delivery and pick-up around the clock – 24/7

Servicebox is a delivery and pick-up station for all areas where parcels and goods are handed over.

The systems are suitable for both B2B and B2C applications. From letters to pallets – Servicebox can be used for every form of delivery.

Available in more than 20 compartment sizes and individually configurable depending on your area of application.

## BENEFITS ...

### ... for the operator

- ✓ Reduced delivery costs – second or third delivery no longer necessary.
- ✓ Competitive advantage through differentiation from the competition.
- ✓ Increased service capabilities.
- ✓ Workflows can be adapted to your company process and linked to your ERP or webshop software.

### ... for the user

- ✓ 24/7 delivery and pick-up of parcels and goods.
- ✓ No waiting times when picking up products.
- ✓ Pick-up notification by e-mail or SMS.
- ✓ Never miss a delivery again.
- ✓ Contactless handover.

## Applications:

### Repairs

Defective devices are delivered to the system. After the repair, it is returned via the same Servicebox.

### Company mailroom

Employees pick up private parcels directly at the unit – employee benefit.

### Servicestation

External service providers deliver their goods directly to the unit.

### Parcel station

The parcel service provider delivers the shipment directly to the unit. The recipient picks it up flexibly from there.

### E-Concierge

Ideal as a parcel and servicestation for apartment buildings, residential complexes or student residences.

### DIY stores / Wholesalers

Palettes can be delivered and picked up around the clock.

# COOLED LOCKERS

## COOL LOCKERS

### Cooled lockers for groceries

The temperature-controlled cool lockers enable the delivery of groceries, goods and sensitive equipment and material to end customers.

In addition to cooling and freezing modules, the system can also be equipped with heating compartments.

The systems are suitable for B2B and B2C applications. Optionally, the cool lockers can also be used as vending machines.

## BENEFITS ...

### ... for the operator

- ✓ Offer your customers a round-the-clock pick-up option for your goods.
- ✓ Offer your customers more flexibility and improved service for their purchases – for long-term customer loyalty.
- ✓ A pick-up station increases your turnover and relieves your employees.
- ✓ The vending machine is already integrated.
- ✓ Various compartment sizes are available.

### ... for the user

- ✓ Order and pick up food and goods around the clock – completely flexible.
- ✓ Online shopping with pick-up at the unit saves time in the store.
- ✓ Just-in-time pick-up: the goods are ready on time at the desired date.
- ✓ Even spontaneous purchases with larger shopping baskets are possible at the unit.

### Applications:

- GROCERY STORES**
- BUTCHER SHOPS**
- SHOPPING CENTERS
- PHARMACIES**
- CATERING SERVICES
- INDUSTRY**
- LABORATORIES**

# BICYCLE STORAGE

## VELOSAFE

### Secure bicycle locker

Secure, weatherproof and with an integrated charging option – Velosafe offers a protected parking space for bicycles and e-bikes in public spaces.

With the Velosafe bicycle lockers, LockTec offers a sophisticated solution for modern, urban mobility needs. Whether for commuters, tourists or company employees – the intelligent bicycle lockers reliably protect bikes from theft and the elements. Velosafe can also be expanded and flexibly combined.

## BENEFITS ...

### ... for the operator

- ✓ The lockers are robust and offer secure protection.
- ✓ The systems can be networked together.
- ✓ Integration into various booking portals is possible.
- ✓ The solution supports sustainable mobility concepts for cities and municipalities.
- ✓ Payment directly at the unit is optionally possible.
- ✓ The infrastructure strengthens urban mobility.

### ... for the user

- ✓ Bicycles and e-bikes are securely protected.
- ✓ Flexible and easy to use.
- ✓ E-bikes can be conveniently charged at the unit.
- ✓ Spontaneous use is possible due to the payment option at the unit.
- ✓ Advance reservations can be made via the booking portal.

### Applications:

- INNER CITIES**
- PARK & RIDE AREAS
- BUS & TRAIN STATIONS**
- COMPANY PREMISES
- SMART CITIES**

# BICYCLE STORAGE

## VELOBOX

### Secure collective bicycle locker

The Velobox collective bicycle garage reliably meets the growing demand for secure bike storage in local transport and tourism.

Thanks to modern access technology and high-quality workmanship, the Velobox offers maximum security and flexibility – ideal for cities, residential complexes, train stations and other public locations.

Velobox can optionally be expanded with integrated luggage lockers, benches or green roofs.

## BENEFITS ...

### ... for the operator

- ✓ The systems can be networked together.
- ✓ A connection to various booking portals is possible.
- ✓ The solution supports sustainable mobility concepts.
- ✓ Payment directly at the unit is optionally possible.
- ✓ The solution promotes sustainable urban mobility.
- ✓ The unit is craneable and can therefore be installed flexibly.

### ... for the user

- ✓ Bicycles and e-bikes are securely protected.
- ✓ Flexible and easy to use.
- ✓ Spontaneous use is possible due to the payment option at the unit.
- ✓ Advance reservations can be made via the booking portal.
- ✓ Charging option for batteries and secure storage of helmets or backpacks in Servicebox Smart lockers.

### Applications:

**INNER CITIES**

**PARK & RIDE AREAS**

**BUS & TRAIN STATIONS**

**COMPANY PREMISES**

**SMART CITIES**

**STADIUMS**

# THE SMART SEARCH PORTAL LOCKPORT

## Booking portal for lockers.

Find it. Book it. Use it.

Lockport is the central platform for booking luggage and bike lockers – anytime and anywhere. Whether at train stations, shopping centers or other public places: with Lockport users can quickly and conveniently find free lockers, reserve them online and benefit from uncomplicated use.

## BENEFITS ...

### ... for the operator

- ✓ Increased usage thanks to better discoverability.
- ✓ Administration is done efficiently and intuitively through the backend.
- ✓ Handling effort is minimized, resulting in less administrative work.
- ✓ Centralized reporting offers detailed statistics about usage and utilization.
- ✓ Flexible license models enable adaptation to individual requirements.

### ... for the user

- ✓ Booking is quick and simple – even without previous registration.
- ✓ Spontaneous use is possible, even without internet access.
- ✓ Contactless payment allows for cashless transactions at the unit.
- ✓ Access is secure and navigation is intuitive – optimized for every application.

## Universally applicable – for cities, train stations & companies

Lockport can be used in various areas: from train stations and airports to city furniture and corporate solutions. The platform is scalable, customizable and can be efficiently integrated into existing processes.

# AUTOMATED DOCUMENT TRANSFER SMARTTERMINAL

## Übergabe rund um die Uhr

Secure, contactless and efficient.

SmartTerminal is the ideal solution for companies, authorities and institutions that want to provide documents like IDs, license plates or contracts around the clock in a secure and controlled environment.

Thanks to the integrated software, handover processes can be automated. At the same time, administrative work is reduced and human resources are conserved. The intuitive user navigation ensures simple operation.

# SMARTTERMINAL

PICK-UP AND DELIVERY  
AROUND THE CLOCK  
24 HOURS / 7 DAYS A WEEK

## BENEFITS ...

### ... for the operator

- ✓ Administrative processes are being digitalized as part of smart cities.
- ✓ Automation significantly reduces the administrative workload.
- ✓ The handover process is secure and documented.
- ✓ Reduced personnel expenses ensure noticeable cost savings.
- ✓ Direct interface to HESS Cash Systems GmbH is available.

### ... for the user

- ✓ Access is possible around the clock – without any waiting times.
- ✓ Easy and intuitive to use thanks to clear navigation.
- ✓ Maximum flexibility in reception and pick-up is guaranteed.
- ✓ Time and cost savings thanks to collective deliveries in the B2B sector.

### Applications:

**TOWN HALLS**

**AUTHORITIES**

**VEHICLE REGISTRATION  
OFFICES**

**LOCAL AUTHORITIES**

**CORPORATIONS**

**UNIVERSITIES**

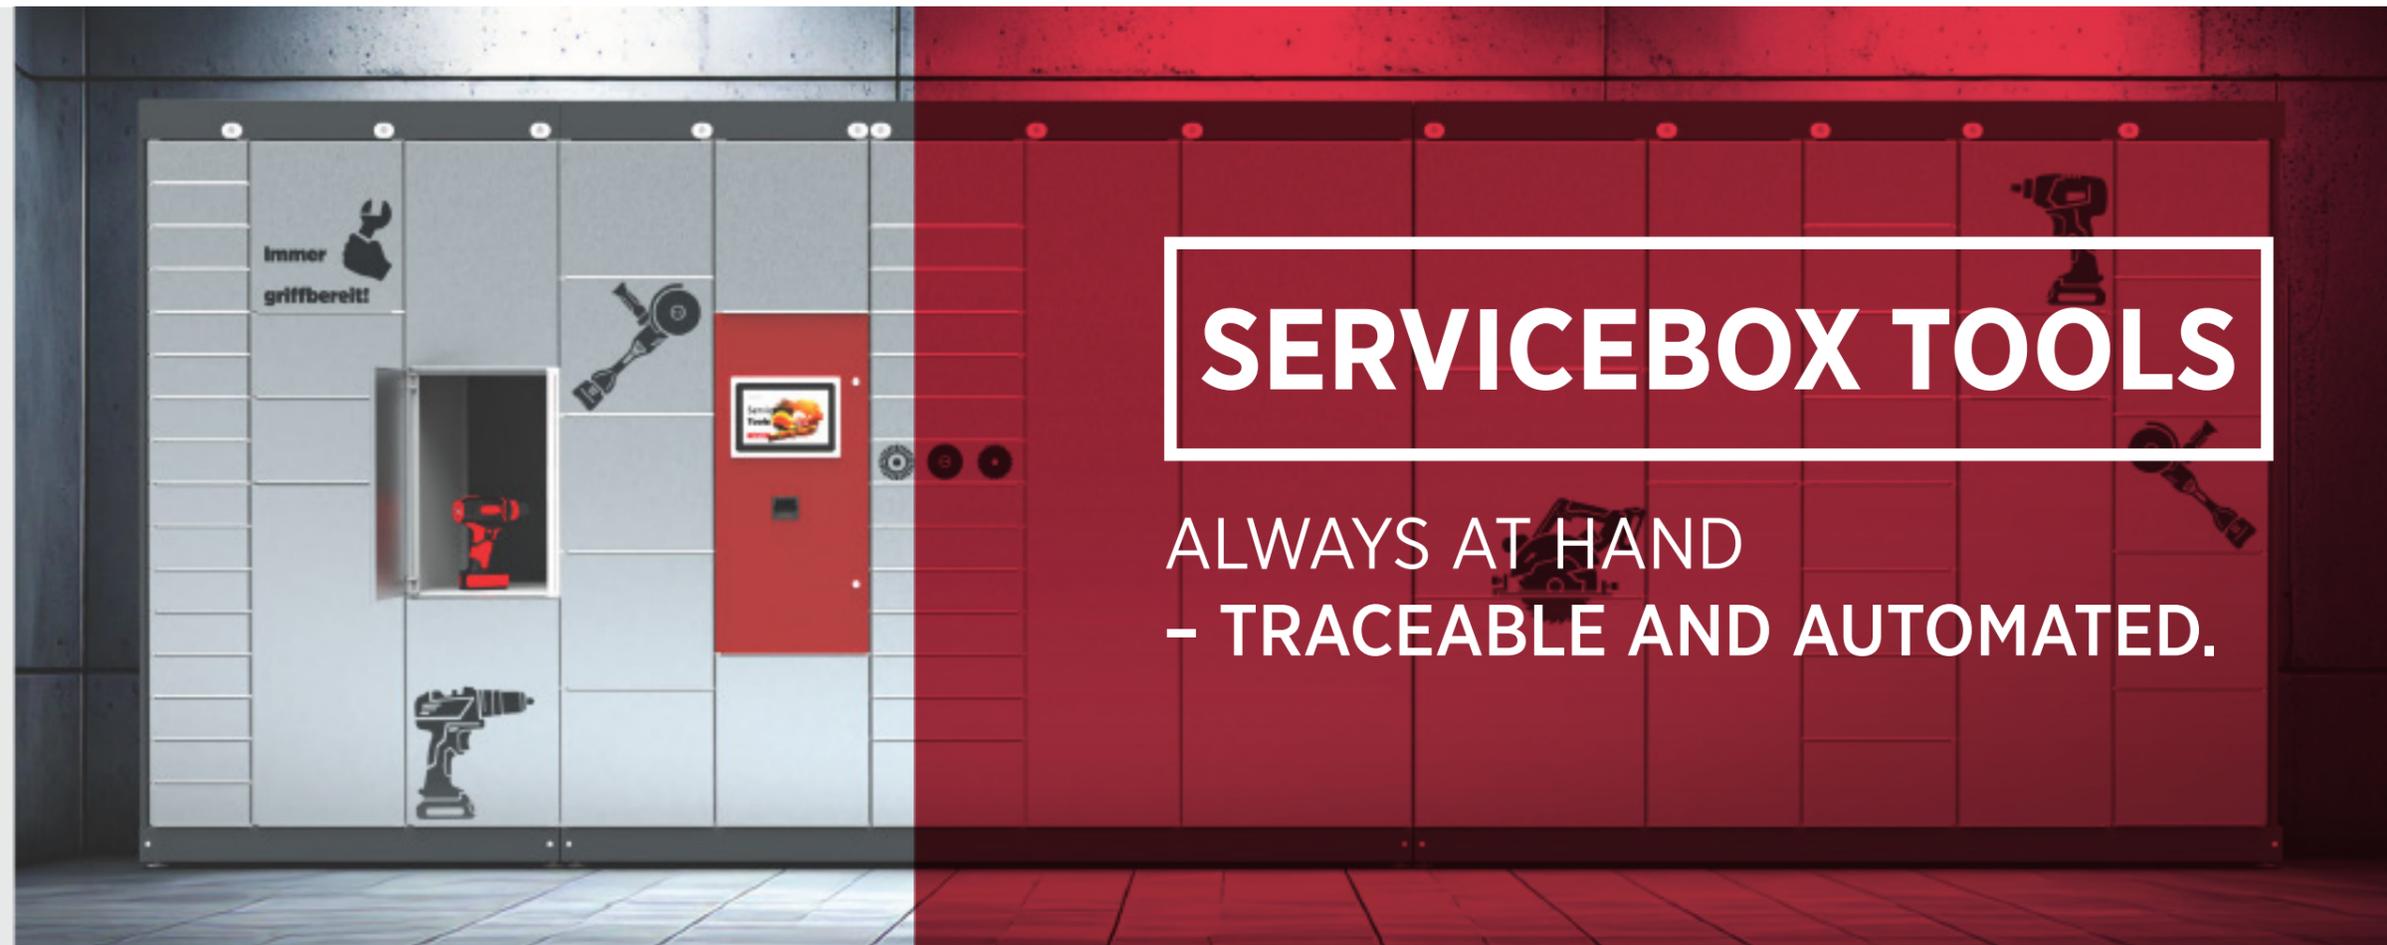

# SMART INTRALOGISTICS

## SERVICEBOX TOOLS

### Optimized distribution of goods for companies

Servicebox Tools revolutionizes your tool and material management. The smart locker solution enables the contactless, secure and traceable distribution and return of tools, spare parts and work materials.

Whether it's laptops, measuring instruments or simple consumables – with Servicebox Tools everything is always at hand.

## BENEFITS ...

### ... for the company

- ✓ Cost savings due to reduced travel and waiting times.
- ✓ Both functional and defective items are recorded and managed.
- ✓ Operational organizational processes are significantly improved.
- ✓ Tools and valuable equipment can be tracked at all times.
- ✓ Defective tools or falling below the minimum stock levels automatically trigger a notification.

### ... for the employees

- ✓ The warehouse is relieved through better planning.
- ✓ Even with several locations, short distances are guaranteed.
- ✓ Work equipment is available around the clock.
- ✓ Stock levels and availability can be viewed transparently.
- ✓ Contactless handover of tools and equipment.
- ✓ PowerCharge ensures that batteries are always charged.

## Features

### Notifications

Employees are automatically notified – for example, if minimum stock level is not reached or about the condition of returned items.

### Warranty and inspection intervals

When inspection dates are due – e.g. for measuring devices – the item is automatically blocked until the inspection or maintenance has been completed.

### Status display

Various conditions of the item can be specified when returning it.

### Traceability

See at any time who has removed or returned which item and when.

### User management

Create users and assign individual rights.

## OTHER LOCKER SOLUTIONS SPECIAL PURPOSES

### Storing your purchases

With Servicebox Smart, customers can securely store their purchases and collect them at any time. This makes the shopping experience flexible – without the hassle of carrying bags.

Ideal for shopping centers, grocery stores and retailers that want to offer their customers more flexibility.

**SERVICEBOX SMART**

### Automated parcel acceptance in properties

E-Concierge is the ideal solution for apartment buildings, residential complexes and offices. Parcels are deposited without contact and can be collected by residents at their convenience – without any waiting times or personal contact. A modern and efficient alternative to traditional internal mail.

**E-CONCIERGE**

**SERVICEBOX BIBLIO**

### Media distribution around the clock

With Servicebox Biblio, libraries offer 24/7 access to knowledge and education. Books and media can be conveniently reserved online, collected from the unit and returned – regardless of opening hours. This makes the service more comfortable, modern and user-friendly.

**SERVICEBOX BASIC**

### Secure handover of medication

Servicebox Basic enables contactless and flexible dispensing of medication. Patients can collect their prescribed medication or online orders securely at any time – regardless of opening hours. Ideal for pharmacies, health centers and pharmaceutical service providers.

## OTHER SOLUTIONS

### Urban solutions for smart cities

Functional design meets intelligent technology: the city furniture by LockTec offers versatile solutions for urban spaces.

Classic furniture – perfect for modern smart cities, that want to offer citizens more comfort and security in public spaces.

Benches, tables, bicycle shelters and simple bike racks are part of the extensive range.

## YOUR BENEFITS

- ✓ High-quality, weatherproof materials for outdoor use.
- ✓ Integration into existing city and traffic concepts.
- ✓ Sustainable solutions for modern city development.

## OTHER SOLUTIONS

### Protection that fits

Whether it's for locker systems or to protect your equipment – inside or outside your buildings:

Our collision protection can be customized to your individual requirements and ensures greater safety on the premises.

### The right signage

Entrance and information signs, signposts or advertising signs – with or without lighting:

We integrate your signage seamlessly into existing guidance systems or realize complete concepts made to measure. We process different materials – from HPL panels to aluminum to high-quality stainless steel for designer steles.

# MODERN SOFTWARE

## LS-OS – THE SMART CONTROL SOLUTION

### Software

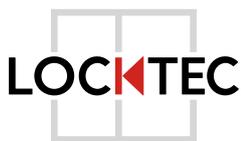

Our specially developed software LS-OS (LockTec SITEC Operating System) has been in use worldwide since 2015. It combines decades of experience in the field of locker technology with innovative, modern technologies.

LS-OS enables the reliable operation of locker systems – from individual units to complex, networked solutions on a national level. Thanks to integrated interfaces (JSON & REST), the software can be easily integrated into existing ERP systems or online stores.

### Your benefits at a glance:

- ✓ Reliable – stable, secure software for smooth operation.
- ✓ Scalable – suitable for small and large systems.
- ✓ Powerful – optimized for fast and efficient processes.
- ✓ Flexible networking – compatible with cloud solutions and APIs.
- ✓ User-friendly – modern front & backend for intuitive operation.

Thanks to the latest web technology, LS-OS can be individually adapted to your requirements – from the user interface to integration into existing workflows.
